EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Harvey Gilbert on August 14, 2003.

The application has been amended as follows:✓

In claim 11, change "LED array" to radiation emitting means✓

In claim 11, change "plurality of batteries" to power supply means✓

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

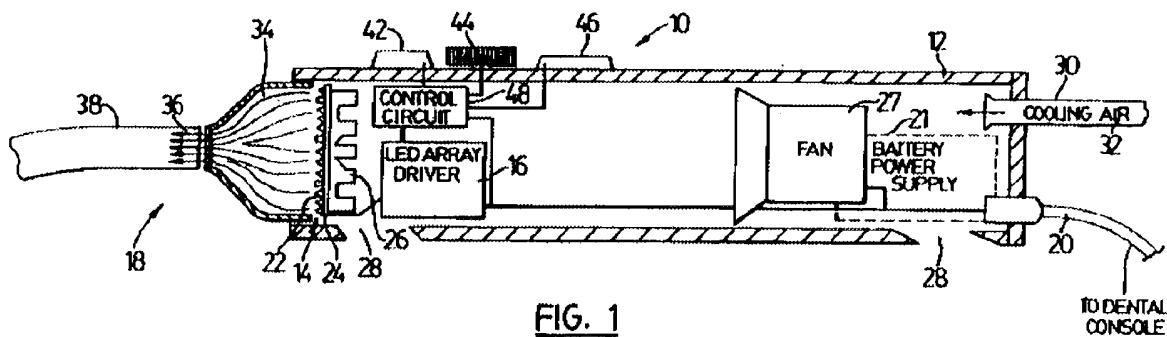

Claims 1 and 11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kennedy et al.

Kennedy et al. teaches an apparatus for curing an adhesive comprising a housing (12) having an insulating cylindrical and disk shaped section, an LED array (22), a battery supply for the LED (21), an insulating spacer layer between the batteries and LED array (26), a switch relay in the interior of the housing (48), a disc shaped

Art Unit: 2881

cover transparent to the radiation connected to the cylindrical section (Flat cap member on tip of endpiece), and an external switch means (44) as recited in claims 1 and 11.

Note Fig. 1 below.

Allowable Subject Matter

Claims 2-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art fails to teach or suggest the device of claim 1 further comprising a fuse between the switch relay and LED and a safety pin to engage the housing and switch mechanism.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David A Vanore whose telephone number is 703-306-0246. The examiner can normally be reached on M-F 7:30-5:00.
